

Is Flock Safety watching your child?

Flock Safety, the company most popular for their automatic license plate readers, doesn't just focus on vehicles.

A playground, a gymnastics room, a school, a community center, and a pool were all being watched by Flock sales employees. Some members of the team had been watching these cameras for hours.

This isn't the only concern with these cameras where our kids play. Not only have these cameras have been shared online with no password required, but also are able to be hacked within minutes.

The PTZ, pan-tilt-zoom, cameras will automatically zoom in and follow people as they move through the area of view. They are able to zoom in with such clarity you can watch what people are looking at on their phones.

Contact your county Board of Supervisors and City Council members today and demand these cameras be removed.

Scripts and more information can be found online at
